### DETAILED ACTION

The amendment filed 7/21/05 and the remarks presented therewith have been carefully considered. However, they are not deemed to be fully persuasive.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 43 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no disclosure in the original specification for a method step of running a *second* tool through the same overshot tool as is recited in newly presented claim 43.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 29-33, 35, 36, 38, and 39 are rejected under 35 U.S.C. 102(b) as being anticipated by Chenoweth (3,199,906).

Chenoweth shows a retrieving tool comprising a housing (20) having an inclined inner surface (48), gripping members (47) having inclined outer surfaces (53), a piston (26) operable to disengage the gripping members from an item, a sub (23), a sealing shoe (21), and a biasing member (43).

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 29-34, 36-38, and 40-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beeman (5,242,201) in view of Taylor (5,765,638).

The Beeman ('201) patent shows an embodiment in Figures 5-8 that contains all of the structural elements as broadly as recited in the above claims of the instant application except for inclined outer surfaces on its gripping members (92).

Taylor ('638) shows a plurality of gripping members (16) each having multiple outer ramp surfaces cooperatively engaging multiple ramp surfaces on the inner surface of the tool's body.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide multiple inclined surfaces on each of the Beeman gripping members (92) cooperating with a like number of inclined surfaces on the tool body as taught by Taylor in order to create a larger gripping area along the vertical

dimension of the tool allowing a more secure grip of certain shaped items being retrieved.

***Allowable Subject Matter***

7. Claims 15-28 are allowed.

***Drawings***

8. The drawings were received on 7/21/05. These drawings are approved by the examiner.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
